CONTENTS

The Morphology of Iron-Nickel Massive Martensite
J. M. MARDER, A. R. MARDER 1

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel—A Mathematical Analysis
S. NIEDZWIEDZ, B. WEISS, Y. PARTOM 11

Alternative Steels for Precision Gyro Ball Bearings
THOMAS J. HUGHEL 18

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union
T. J. KOPPENAAL 24

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni_3Nb Eutectic Alloy
R. T. QUINN, R. W. KRAFT, R. W. HERTZBERG 38

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys
E. W. PAGE, P. MANGANON, JR., G. THOMAS, V. F. ZACKAY 45

Correlation of Microstructures With Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite
Y. H. LIU 55

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys
J. M. KRAFFT, J. H. MULHERIN 64

Relative Long-Time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys
H. E. COLLINS 82

Elevated/Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni_3Ti Eutectic Alloy
K. D. SHEFFLER, R. W. HERTZBERG, R. W. KRAFT 105

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc
WILLIAM H. MCCARTHY, JOHN C. SHYNE, OLEG D. SHERBY 117

Nonuniform Size Changes of High-Speed Steels During Heat Treatment
G. STEVEN 130

Structure and Properties of Ni_3Al (γ') Eutetic Alloys Produced by Unidirectional Solidification
E. R. THOMPSON, F. D. LEMKEY 140

Experimental Correlations for High-Temperature Creep
AMIYA K. MUKHERJEE, JAMES E. BIRD, JOHN E. DORN 155

Effect of Nitrogen on the Fine Structure of High-Speed Steels
G. STEVEN, J. J. HAUSER, T. A. NEUMEYER, J. M. CAPENOS 180

The Chemical Partitioning of Elements in Gamma Prime Separated From Precipitation-Hardened, High-Temperature Nickel-Base Alloys
OWEN H. KRIEGE, J. M. BARIS 195

Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys
MARVIN MOSS, D. M. SCHUSTER 201

Character of Slip Bands in Iron and a Mild Steel With Manganese
J. D. BOYD, G. T. HAHN, A. R. ROSENFIELD, E. VOTAVA 206

Morphology of Martensite Formation in a 300-Grade Maraging Steel
ALFRED GOLDBERG 219

Quantitative Metallography of Microduplex Structures After Superplastic Deformation
R. J. LINDINGER, R. C. GIBSON, J. H. BROPHY 230

Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy
A. J. SEDRIKS, P. W. SLATTERY, E. N. PUGH 238

Ultra High-Strength Maraging Steel Wire
R. L. CAIRNS 244

Role of Specific Impurities on the Magnetic Properties of Low-Carbon Steels
J. H. SWISHER, A. T. ENGLISH, R. C. STOFFERS 257

Low-Cycle Fatigue Crack Initiation in Ti-6Al-4V
C. H. WELLS, C. P. SULLIVAN 263

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18% Nickel Maraging Steels
CHARLES J. NOLAN AND THOMAS E. DAVIDSON ... 271
Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere (N)*
HIDEYA OKADA, YUZO HOSOI, KENICHI YUKAWA, HIROMITSU NAITO ... 278
Mechanisms of Formation of Ductile Fatigue Striations (N)
R. M. N. PELLOUX ... 281
Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections (N)
R. C. GLENN, G. LANGFORD, A. S. KEH ... 285
Capacitor-Discharge Pulse Heating (N)
D. A. KARLYN ... 288
Strain-Rate Sensitivity as a Measure of Ductility (N)
D. W. WOODFORD ... 291
X-Ray Technique for Examination of Single Crystals (N)
RICHARD S. MATEER ... 293
Deformation of Artificial Inclusions in Compressive Plane Strain (N)
R. H. ZEISLOFT, W. F. HOSFORD ... 297
A Comparison of Creep and Hot Working Strain-Rate Relationships (N)
J. J. JONAS ... 300
Liquidus of the Na-Ag System: 0 to 6 At. % Ag (N)
JOHN R. WEEKS ... 304
Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels
C. VISHNEVSKY, E. A. STEIGERWALD ... 305
Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated With Molybdenum Disulfide
S. BHATTACHARYYA, H. SCHWARTZBART ... 318
Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V
P. J. FOPIANO, MICHAEL B. BEVER, B. L. AVERBACH ... 324
The Effects of Geometry on the Cooling of Plates and Bars
R. A. REGE, P. E. HAMILL, JR., J. M. HODGE ... 333
Influence of Extrusion Variables on the Microstructure of the Titanium 5Al-2.5Sn Alloy
ATTWELL M. ADAIR ... 345
Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments
DAVID KALISH, MORRIS COHEN ... 353
The Effect of Quench Rate on the Ms Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel
R. W. MESSLER, JR., G. S. ANSELL, V. I. LIZUNOV ... 362
Electron Metallography of the Substructure of Martensite in High-Carbon Steels
M. OKA, C. M. WAYMAN ... 370
Fractography and Fracture Mechanics
R. C. BATES, W. G. CLARK, JR. ... 380
Recrystallization in Thoria-Dispersed Nickel Sheet
E. R. KIMMEL, M. C. INMAN ... 390
Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys
M. J. BLACKBURN, J. C. WILLIAMS ... 398
The Reactivity of Hydrogen With Ti-6-Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures
G. F. PITTINATO ... 410
Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions
C. M. PREECE, A. R. C. WESTWOOD ... 418
A Perturbation Analysis of Phase Interface Stability in Ternary Systems
D. E. COATES, J. S. KIRKALDY ... 426
The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Lüders Strain of Carbon Steel
H. J. KOUWENHOVEN ... 437

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30% Mn Steels Containing Oxygen and Sulfur
D. A. WITMER, G. KRAUSS 447
Relationship Between Composition, Microstructure and Stress Corrosion Cracking (in Salt Solution) in Titanium Alloys
R. E. CURTIS, R. R. BOYER, J. C. WILLIAMS 457
The Effect of Deformation Voids on Austenite Grain Growth in Steels
DONALD WEBSTER 470
Investigation of the Influence of Tungsten on the Morphology of the γ' Precipitation in Nickel-Base Superalloys
ANDREJ HALVALDA 477
Coherency Strains in γ' Hardened Nickel Alloys
R. F. DECKER, J. R. MIHALISIN 481
Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steel
E. T. STEPHENSON 490
Effect of Cracks on Creep Rate
J. WEERTMAN 502
Effect of Cracks on Creep Rate—Part II (Experimental)
W. V. GREEN, E. G. ZUKAS, J. WEERTMAN 512
Work Hardening and Creep of Aluminum and Copper During Alternate Stressing
IRVIN R. KRAMER 521
The Direct Observation of Superplasticity in Al-78% Zn (N)
K. D. FIKE, H. J. RACK 537
Fractographic Observations of Stretched Regions in Front of Fatigue Cracks (N)
W. W. GERBERICH, P. L. HEMMINGS 540
Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy—A Metallographic Observation (N)
D. A. FERRILL, H. K. MINASSIAN 543
Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite (N)
Y. H. LIU 544
A Metallographic Method for Studying Reaction Kinetics in Spheres (N)
T. B. LINDEMER, M. D. ALLEN 547
Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C (N)
H. H. SMITH, P. SHAHINIAN 549
Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure (N)
P. S. VENKATESAN 552
Effect of Prestrain Temperature and Rate on the Retardation of Strain Aging in Rimmed Steel (N)
E. C. OREN, D. A. KARLYN 554
Correction to Vol. 61, p. 693 558
Correction to Vol. 62, pp. 183 and 184 558
Controlled-Cooled Structural Steels Modified With Columbium, Molybdenum, and Boron
R. L. CRYDERMAN, A. P. COLDREN, J. R. BELL, J. D. GROZIER 561
Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels
O. D. SHERBY, M. J. HARRIGAN, L. CHAMAGNE, C. SAUVE 575
Influence of Tungsten on the γ' to η Transformation and Carbide Reactions in Nickel-Base Superalloys
ANDREJ HAVALDA 581
Hot Corrosion Reactions in Nickel, Cobalt, and Nickel-Aluminide-Base Alloys
M. KAUFMAN 590
Anomalous Ductility of Trip Steel
E. GOLD, T. J. KOPPENAAL 607
Precipitation in Nickel-Base Alloy 718
D. F. PAULONIS, J. M. OBLAK, D. S. DUVALL 611
Strain Hardening of Iron by Severe Plastic Deformation
GEORGE LANGFORD, MORRIS COHEN 623

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a γ' Precipitation Hardened Nickel-Base Alloy
B. H. Kear, G. R. Leverant, J. M. Oblak 639
Fatigue Fracture Appearance and the Kinetics of Striation Formation in Some High-Strength Steels
G. A. Miller 651
Structure and Mechanical Properties of Fe-Ni-Co-C Steels
S. K. Das, G. Thomas 659
The Mechanism of Stress Corrosion Cracking in Cu-Al Alloys
A. W. Blackwood, N. S. Stoloff 677
Plastic Flow in Binary Substitutional Alloys of BCC Iron—Effects of Strain Rate, Temperature and Alloy Content
W. C. Leslie, R. J. Sober, S. G. Babcock, S. J. Green 690
The Strength Differential in Two-Phase Alloys
R. J. Olsen, G. S. Ansell 711
Interdiffusion in Silver Versus Silver-Manganese (8 at %) Diffusion Couples
R. S. Barclay, P. Niessen 721
Mechanism of Formation of Precipitate-Free Zones in an Al-4.7% Zn-3.9% Mg Alloy
W. F. Smith, N. J. Grant 724
Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum
A. R. Borzillo, W. C. Hahn, Jr. 729
Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief
S. S. Hecker, C. H. Hamilton, L. J. Ebert 740
Mechanical Behavior of Tantalum-Base T-111 Alloy at Elevated Temperature
K. D. Sheffler, J. C. Sawyer, E. A. Steigerwald 749
The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement
D. Webster 759
Martensite-Start Temperatures Versus Pressure for 43XX Steels
Roamer E. Predmore, Eugene P. Klier 768
Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels
D. F. Stein, A. Joshi, R. P. Laforce 776
The Recovery of the Cold-Worked Compound AgMg
A. K. Jena, J. H. Westbrook, M. B. Bever 784
Some Solutions to the Ternary Diffusion Equations with Variable Off-Diagonal Diffusion Coefficients
G Bolze, D E. Coates, J. S. Kirkaldy 794
Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites (N)
J. E. Sheehan, J. S. Hirschhorn 804
A Differential Thermal Analysis Study of the Age-Hardening of Brass Containing Nickel and Silicon or Nickel and Aluminum (N)
F. H. Cocks 805
Dimensional Stability of a 12% Nickel Maraging Steel at Ambient Temperatures (N)
M. R. Meyerson, L. Friedman, P. M. Giles 809
Fracture Modes in Laminated Steel-Nickel Composites (N)
S. Floreen, H. W. Hayden, J. Q. Steigelman 812
Deformation Within Precipitate-Free Zones in an Aged Al-Zn-Mg Alloy (N)
A. J. Sedriks, P. W. Slattery, E. N. Pugh 815
Electron Probe Determination of Phase Volume Fractions (N)
J. Waldman, M. Schwartz, S. Nash 818
On an Unusual Type of Substructure in High-Carbon Ferrous Martensites (N)
M. Oka, C. M. Wayman 820
The Influence of Case Properties and Retained Austenite on the Behavior of Carburized Components
F. T. Krotine, M. F. McGuire, L. J. Ebert, A. R. Troiano 829
The Critical Reaction Rate for Corrosion Fatigue of 0.18% Carbon Steel and the Effect of pH
D. J. Duquette, H. H. Uhlig 839

Precipitation in Fe-Ni-Co Alloys 852
G. Thomas, I-Lin Cheng, J. R. Mihalisin ... 852
Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy
Peter L. Raffo ... 846
The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels
D. V. Neff, T. E. Mitchell, A. R. Troiano ... 858
The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites
J. R. Getten, L. J. Ebert ... 869
Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy
L. K. Singhal, M. L. Vaidya ... 879
The Effect of Temperature on the Early Stages of Plastic Flow in Titanium-Scavanged Iron
H. D. Solomon, C. J. McMahon, Jr., W. C. Leslie ... 886
Influence of Deformation on the Tempering of 1045 Martensite
M. F. Miller, N. N. Breyer ... 891
New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals
M. Grounes, S. Rao ... 902
The System Zirconium-Hafnium-Oxygen
R. F. Domagala, Robert Ruh ... 915
A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits
W. D. Hepfer, D. R. Betner, M. Herman, V. H. Thevenow ... 926
Strengthening of "MP Alloys" During Aging at Elevated Temperatures
A. H. Graham ... 930
Strengthening Mechanisms in Dispersion Hardened Nichrome
D. Webster ... 936
Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation
R. C. Rau, S. F. Bartram, F. N. Flagella ... 949
The Formation of Low-Carbon Martensite in Fe-C Alloys
A. R. Marder, G. Krauss ... 957
Structural Observations in a Metastable Austenitic Steel
James A. Hall, Victor F. Zackay, Earl R. Parker ... 965
Precipitation of Hydrides in Titanium Alloys
J. D. Boyd ... 977
The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel
R. P. Procter, H. W. Paxton ... 989
A Generalized Model for Hydrogen Embrittlement
D. G. Westlake ... 1000
A Study of Gaseous Hydrogen Damage in Certain FCC Metals
Richard M. Vennett, S. Ansell ... 1007
Chemical Diffusivities of Delta Stabilized Pu-Zr Alloys (N)
M. R. Harvey, A. L. Rafalski, D. H. Riefenberg ... 1014
An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation (N)
P. W. Palmberg, H. L. Marcus ... 1016
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing (N)
J. L. Youngblood ... 1019
Normalized Hardness Test Data for Aged Al-Cu Alloys (N)
John C. McDonald ... 1020
On the Nature of Microcracks in High-Carbon Martensite (N)
R. A. Grange ... 1024
Campbell Memorial Lecture:
Materials R & D: Planning, Programming, Budgeting and Measurement
W. R. Hibbard, Jr. ... 1030
Metallurgical Classic:
Process of Reducing Aluminium by Electrolysis

An Electrolytic Process for the Preparation of Aluminium
Explanatory Note 1043
Commentary: Hall, Héroult, Aluminum and Fused Salt Electrometallurgy
PHILIP T. STROUP 1045
Description of Machines and Procedures for Which Patents of Invention Have Been Taken Under the Regime of the Law of July 5, 1844
PAUL LOUIS T. HÉROULT 1072
Process of Reducing Aluminium by Electrolysis
CHARLES M. HALL 1076
Index to Volume 62 1079

Subject Index

ACICULAR STRUCTURE

Martensite-Start Temperatures Versus Pressure for 43XX Steels 768-775

ADHESION

Frictional Studies of Tool Steel Against Ag, In, Pb, Sh and Cd Under High Pressure 552-554

ADSORPTION

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

AGING

Role of Specific Impurities on the Magnetic Properties of Low-Carbon Steels .. 257-262

Alternative Steels for Precision Gyro Ball Bearing 18-23

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys ... 45-54

Fractography and Fracture Mechanics 380-389

Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547

Martensite-Start Temperatures Versus Pressure for 43XX Steels 768-775

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

ALUMINUM

A Comparison of Creep and Hot Working Strain-Rate Relationships 300-303

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions .. 418-425

Work Hardening and Creep of Aluminum and Copper During Alternate Stressing 521-536

Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805

A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

ALUMINUM, ALLOYING ELEMENTS

Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409

The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540

ALUMINUM, COMPOSITE MATERIALS

The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878

ALUMINUM-BASE ALLOYS

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81

Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys .. 201-205

Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243

Mechanisms of Formation of Ductile Fatigue Striations 281-285

X-Ray Technique for Examination of Single Crystals 293-297

Fractography and Fracture Mechanics 380-389

Mechanism of Formation of Precipitate-Free Zones in an Al-4.7 Per Cent Zn-3.9 Per Cent Mg Alloy 724-728

Deformation Within Precipitate-Free Zones in an Aged Al-Zn-Mg Alloy 815-818

Normalized Hardness Test Data for Aged Al-Cu Alloys 1020-1023

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456

ANTIMONY

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

ATMOSPHERIC CORROSION

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

AUSFORMING

Anisotropy of Properties in Martensite As Developed by Thermomechanical Treatments 353-361

AUSTENITE

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel — A Mathematical Analysis 11-17

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

Precipitation in Fe-Ni-Co Alloys 852-857

Structural Observations in a Metastable Austenitic Steel 965-976

The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 434D Steel 989-999

AUSTENITIC STAINLESS STEELS

Fractographic Observations of Stretched Regions in Front of Fatigue Cracks .. 540-543

The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy 879-885

A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

AUSTENITIZING

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37

BAINITE

Correlation of Microstructures With Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite 55-63

Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547

Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676

BALL BEARINGS

Alternative Steels for Precision Gyro Ball Bearing 18-23

BANDED STRUCTURE

Character of Slip Bands in Iron and a Mild Steel With Manganese 206-218

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456

BARS

The Effects of Geometry on the Cooling of Plates and Bars 333-344

BCC METALS

Plastic Flow in Binary Substitutional Alloys of BCC — Effects of Strain Rate, Temperature and Alloy Content 690-710

BEARING STEELS

Alternative Steels for Precision Gyro Ball Bearing 18-23

BERYLLIUM

A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 926-929

BINARY SYSTEMS

Liquidus of the Na-Ag System — 0 to 6 at Per Cent Ag 304-0

BISMUTH-BASE ALLOYS

Deformation of Artificial Inclusions in Compressive Plane Strain 297-300

BORON, FIBER METALLURGY

Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805

The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878

BOX ANNEALING

Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steel 490-501

BRASSES

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions .. 418-425

A Differential Thermal Analysis Study of the Age-Hardening of Brass Containing Nickel and Silicon or Nickel and Aluminum 805-809

BRITTLE FRACTURE

Fracture Modes in Laminated Steel-Nickel Composites 812-815

CADMIUM

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

CAMPBELL MEMORIAL LECTURE

Materials R&D., Planning, Programming, Budgeting and Measurement 1029-1038

CARBIDES

Relative Long-time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys 82-104

Nonuniform Size Changes of High-Speed Steels During Heat Treatment 130-139

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

CARBON STEELS

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel — A Mathematical Analysis ... 11-17

Role of Specific Impurities on the Magnetic Properties of Low-Carbon Steels .. 257-262

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369

Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379

The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456

Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580

Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum .. 729-739

On An Unusual Type of Substructure in High-Carbon Ferrous Martensites . 820-827
The Influence of Case Properties and Retained Austenite on the Behavior of Carburized Components 829-838
The Critical Reaction Rate for Corrosion Fatigue of 0.18 Percent Carbon Steel and the Effect of Ph 839-845
Influence of Deformation on the Tempering of 1045 Martensite 891-901
The Formation of Low-Carbon Martensite in Fe-C Alloys 957-964

CARBURIZING
The Influence of Case Properties and Retained Austenite on the Behavior or Carburized Components 829-838

CATHODIC PROTECTION
The Critical Reaction Rate for Corrosion Fatigue of 0.18 Percent Carbon Steel and the Effect of Ph 839-845

CHEMISORPTION
Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551

CHLORIDES, ENVIRONMENT
Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243

CHROMIUM STEELS
On an Unusual Type of Substructure in High-Carbon Ferrous Martensites .. 820-827

COBALT-BASE ALLOYS
Hot Corrosion Reactions in Nickel, Cobalt, and Nickel-Aluminide-Base Alloys . 590-606
Strengthening of Mp Alloys During Aging at Elevated Temperatures 930-935
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

COERCIVE FORCE
Role of Specific Impurities on the Magnetic Properties of Low-Carbon Steels .. 257-262

COHERENCE
Coherency Strains in Gamma Prime Hardened Nickel Alloys 481-489

COLD ROLLING
The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878

COLD WORKING
The Recovery of the Cold Worked Compound AGMG 784-793

COMPACTING
Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805

COMPOSITE MATERIALS
Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323
Recrystallization in Thoria-Dispersed Nickel Sheet 390-397
Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748
Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805
Fracture Modes in Laminated Steel-Nickel Composites 812-815
The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878

COMPRESSION TESTS
Deformation of Artificial Inclusions in Compressive Plane Strain 297-300

COMPRESSIVE STRENGTH
Anisotropy of Properties in Martensite As Developed by Thermomechanical Treatments 353-361
The Strength Differential in Two-Phase Alloys 71I-720

COOLING RATE
The Effects of Geometry on the Cooling of Plates and Bars 333-344
The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369
A Generalized Model for Hydrogen Embrittlement 1000-1006

COPPER
Work Hardening and Creep of Aluminum and Copper During Alternate Stressing . 521-536
A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

COPPER, COMPOSITE MATERIALS
Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

COPPER-BASE ALLOYS
The Mechanism of Stress Corrosion Cracking in Cu-Al Alloys 677-689

CORROSION FATIGUE
Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81
Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243
The Critical Reaction Rate for Corrosion Fatigue of 0.18 Percent Carbon Steel and the Effect of Ph 839-845

CORROSION RESISTANCE
Hot Corrosion Reactions in Nickel, Cobalt, and Nickel-Aluminide-Base Alloys . 590-606
The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

CRACK PROPAGATION
Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81
Mechanisms of Formation of Ductile Fatigue Striations 281-285
Fractography and Fracture Mechanics 380-389
The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417
Fractographic Observations of Stretched Regions in Front of Fatigue Cracks .. 540-543
Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544
Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547
Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551
Fatigue Fracture Appearance and the Kinetics of Striation Formation in Some High-Strength Steels 651-658
The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

CRACKING
Low-Cycle Fatigue Crack Initiation in Ti-6Al-4V 263-270
Effect of Cracks on Creep Rate 502-511
Effect of Cracks on Creep Rate — Part 2 — Experimental 512-520
A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

CRACKS
On the Nature of Microcracks in High-Carbon Martensite 1024-1027
A Comparison of Creep and Hot Working Strain-Rate Relationships 300-303
An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650

CREEP RECOVERY
Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851

CREEP RUPTURE STRENGTH
Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation 949-956

CREEP STRENGTH
The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37
Precipitation in Nickel-Base Alloy 718 611-622
Mechanical Behavior of Tantalum-Base T-111 Alloy at Elevated Temperature 749-758

CREEP TESTS
Strain-Rate Sensitivity as a Measure of Ductility 291-293
Work Hardening and Creep of Aluminum and Copper During Alternate Stressing . 521-536

CRYOGENIC PROPERTIES
The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417

CRYSTAL DEFECTS
Investigation of the Influence of Tungsten on the Morphology of the Gamma Prime Precipitation in Nickel-Base Superalloys 477-480

CRYSTALLOGRAPHY
Structure and Properties of N13Al — Gamma Prime Eutectic Alloys Produced by Unidirectional Solidification 140-154
A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 926-929

CYLINDERS
Nonuniform Size Changes of High-Speed Steels During Heat Treatment 130-139

DENSITY
Influence of Deformation on the Tempering of 1045 Martensite 891-901

DIFFUSION
A Perturbation Analysis of Phase Interface Stability in Ternary Systems 426-436
Interdiffusion in Silver Versus Silver-Manganese — 8 At. Per Cent — Diffusion Couples 721-723
Some Solutions to the Ternary Diffusion Equations with Variable Off-Diagonal Diffusion Coefficients 794-803

DIFFUSIVITY
Chemical Diffusivities of Delta Stabilized Pu-Zr Alloys 1014-1015

DIMENSIONAL STABILITY
Alternative Steels for Precision Gyro Ball Bearing 18-23
Nonuniform Size Changes of High-Speed Steels During Heat Treatment 130-139

Dimensional Stability of a 12 Per Cent Nickel Maraging Steel at Ambient Temperatures 809-812

DISLOCATION DENSITY

Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851

Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation 949-956

DISLOCATIONS

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54

Low-Cycle Fatigue Crack Initiation in Ti-6Al-4V 263-270

Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409

Effect of Cracks on Creep Rate 502-511

Strain Hardening of Iron by Severe Plastic Deformation 623-638

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650

Precipitation of Hydrides in Titanium Alloys 977-988

DISPERSION HARDENING

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129

Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys .. 201-205

Strengthening of MP Alloys During Aging at Elevated Temperatures 930-935

Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948

DISPERSION HARDENING ALLOYS

Recrystallization in Thoria-Dispersed Nickel Sheet 390-397

The Strength Differential in Two-Phase Alloys 711-720

DISSOLVING

Precipitation of Hydrides in Titanium Alloys 977-988

DUCTILE BRITTLE TRANSITION

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

DUCTILE FRACTURE

Fracture Modes in Laminated Steel-Nickel Composites 812-815

DUCTILITY

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277

Anomalous Ductility of Trip — Transformation Induced Plasticity — Steel ... 607-610

Plastic Flow in Binary Substitutional Alloys of BCC Iron — Effects of Strain Rate, Temperature and Alloy Content 690-710

The Influence of Case Properties and Retained Austenite on the Behavior of Carburized Components 829-838

The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

A Generalized Model for Hydrogen Embrittlement 1000-1006

DUCTILITY TESTS

Strain-Rate Sensitivity as a Measure of Ductility 291-293

EDGE DISLOCATIONS

The Effect of Temperature on the Early Stages of Plastic Flow in Titanium-Scavenged Iron 886-890

ELECTRON EMISSION

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

ELECTRON MICROSCOPY

Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547

ELECTRON PROBE ANALYSIS

Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544

ELONGATION

Strain-Rate Sensitivity as a Measure of Ductility 291-293

The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

EMBRITTLEMENT

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions .. 418-425

EQUIAXED STRUCTURE

Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237

ETA PHASE

Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589

ETCH PITTING

A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 926-929

EUTECTICS

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3NB Eutectic Alloy 38-44

Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116

Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154

EUTECTOID COMPOSITION

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel — A Mathematical Analysis ... 11-17

Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580

EXTRUSIONS

Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352

FATIGUE FAILURE

Low-Cycle Fatigue Crack Initiation in Ti-6Al-4V 263-270

Mechanisms of Formation of Ductile Fatigue Striations 281-285

Fractography and Fracture Mechanics 380-389

Fractographic Observations of Stretched Regions in Front of Fatigue Cracks .. 540-543

Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544

Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551

Fatigue Fracture Appearance and the Kinetics of Striation Formation in Some High-Strength Steels 651-658

FATIGUE LIFE

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37

The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

FATIGUE LIMIT

The Critical Reaction Rate for Corrosion Fatigue of 0.18 Percent Carbon Steel and the Effect of Ph 839-845

FATIGUE STRENGTH

The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

FATIGUE TESTS

Mechanisms of Formation of Ductile Fatigue Striations 281-285

FCC METALS

A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

FERRITE

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446

FERROUS ALLOYS

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54

Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections 285-288

Capacitor-Discharge Pulse Heating .. 288-291

Plastic Flow in Binary Substitutional Alloys of BCC Iron — Effects of Strain Rate, Temperature and Alloy Content ... 690-710

Precipitation in Fe-Ni-Co Alloys 852-857

The Effect of Temperature on the Early Stages of Plastic Flow in Titanium-Scavenged Iron 886-890

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

FIBER METALLURGY

Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323

Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805

The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878

FRACTOGRAPHY

Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243

Fractography and Fracture Mechanics 380-389

Fractographic Observations of Stretched Regions in Front of Fatigue Cracks .. 540-543

Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544

Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547

A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 926-929

FRACTURE STRENGTH

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

FRACTURE TOUGHNESS

Correlation of Microstructures with Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite 55-63

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317

Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361

Fractography and Fracture Mechanics 380-389

Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409

The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417

The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

FRACTURING

A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

FRICTION

Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

GALLIUM

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

GALVANIZING

Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum . 729-739

GAMMA-PRIME PHASE

The Chemical Partitioning of Elements in Gamma Prime Separated from Precipitation-Hardened, High-Temperature Nickel-Base Alloys 195-200

Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589

GRAIN BOUNDARIES

X-Ray Technique for Examination of Single Crystals 293-297

Mechanism of Formation of Precipitate-Free Zones in an Al-4.7 Per Cent Zn- 3.9 Per Cent Mg Alloy 724-728

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

Deformation Within Precipitate-Free Zones in an Aged Al-Zn-Ag Alloy 815-818

Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy 879-885

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

GRAIN GROWTH

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

GRAIN ORIENTATION

Mechanisms of Formation of Ductile Fatigue Striations 281-285

A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 926-929

GRAIN REFINEMENT

The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948

GRAIN SIZE

Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237

The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446

The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

GRAIN SUB-BOUNDARIES

Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation 949-956

GRAPHITE

Effect of Cracks on Creep Rate 502-511

Effect of Cracks on Creep Rate — Part 2 — Experimental 512-520

GUINIER PRESTON ZONE

Mechanism of Formation of Precipitate-Free Zones in an Al-4.7 Per Cent Zn-3.9 Per Cent Mg Alloy 724-728

HAFNIUM, TERNARY SYSTEMS

The System Zirconium-Hafnium-Oxygen 915-925

HALIDES

See Chlorides — Sodium Chloride

HARDENABILITY

The Effects of Geometry on the Cooling of Plates and Bars 333-344

Coherency Strains in Gamma Prime Hardened Nickel Alloys 481-489

Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steel 490-501

HARDENING

See Aging/Metallurgical/Precipitation Hardening — Strain Aging — Strain Hardening

HARDNESS

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3NB Eutectic Alloy 38-44

Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352

Martensite-Start Temperatures Versus Pressure for 43XX Steels 768-775

HARDNESS TESTS

Normalized Hardness Test Data for Aged Al-Cu Alloys 1020-1023

Morphology of Martensite Formation in a 300-Grade Maraging Steel 219-229

Ultra High-Strength Maraging Steel Wire 244-256

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277

Influence of Processing Variables on the Microstructure of Extruded Ttianium 5Al-2.5Sn Alloy 345-352

HIGH-SPEED TOOL STEELS

Nonuniform Size Changes of High-Speed Steels During Heat Treatment 130-139

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

HIGH-STRENGTH STEELS

Correlation of Microstructures with Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite 55-63

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High Strength Steels 305-317

Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

Anomalous Ductility of Trip — Transformation Induced Plasticity — Steel .. 607-610

Fatigue Fracture Appearance and the Kinetics of Striation Formation in Some High-Strength Steels 651-658

The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

HOMOGENEITY

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129

HOT PRESSING

Fiber Breakage During Powder Metallurgy Fabrication of Aluminum-Boron Composites 804-805

HOT STAGE MICROSCOPY

The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540

HOT WORKING

A Comparison of Creep and Hot Working Strain-Rate Relationships 300-303

HYDRIDES

Precipitation of Hydrides in Titanium Alloys 977-988

HYDROGEN EMBRITTLEMENT

The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417

Anomalous Ductility of Trip — Transformation Induced Plasticity — Steel .. 607-610

A Generalized Model for Hydrogen Embrittlement 1000-1006

A Study of Gaseous Hydrogen Damage in Certain FCC Metals 1007-1013

HYDROSTATIC EXTRUSION

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277

IMPACT STRENGTH

The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37

Correlation of Microstructures with Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite 55-63

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

IMPREGNATION

Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323

INCLUSIONS

Deformation of Artificial Inclusions in Compressive Plane Strain 297-300

INDIUM

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

INHIBITION

Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum 729-739

INTERMETALLIC PHASES

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44

Relative Long-Time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys 82-104

Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116

Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V . 324-332

Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys . 581-589

Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum . 729-739

Precipitation in Fe-Ni-Co Alloys 852-857

INTERMETALLICS

Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

IRON

Character of Slip Bands in Iron and a Mild Steel with Manganese 206-218

Strain Hardening of Iron by Severe Plastic Deformation 623-638

IRON, TRACE ELEMENTS

Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544

JETS

Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

JOMINY TEST

The Effects of Geometry on the Cooling of Plates and Bars 333-344

KILLED STEELS

Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steels 490-501

LAMINATES

Fracture Modes in Laminated Steel-Nickel Composites 812-815

LATTICE PARAMETERS

The Chemical Partitioning of Elements in Gamma Prime Separated from Precipitation-Hardened, High-Temperature Nickel-Base Alloys 195-200

LATTICE VACANCIES

Influence of Deformation on the Tempering of 1045 Martensite 891-901

LEAD

Deformation of Artificial Inclusions in Compressive Plane Strain 297-300

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

LIQUID METALS

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions .. 418-425

LIQUIDUS

Liquidus of the Na-Ag System — 0 to 6 at Per Cent Ag 304-0

LOW ALLOY STEELS

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317

Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361

The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

On the Nature of Microcracks in High-Carbon Martensite 1024-1027

LOW TEMPERATURE TESTS

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317

MAGNESIUM BASE ALLOYS

The Recovery of the Cold Worked Compound AGMG 784-793

MANGANESE STEELS

Character of Slip Bands in Iron and a Mild Steel with Manganese 206-218

Some Solutions to the Ternary Diffusion Equations with Variable Off-Diagonal Diffusion Coefficients 794-803

MARAGING STEELS

Morphology of Martensite Formation in a 300-Grade Maraging Steel 219-229

Ultra High-Strength Maraging Steel Wire 244-256

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277

Dimensional Stability of a 12 Per Cent Nickel Maraging Steel at Ambient Temperatures 809-812

MARTENSITE

Correlation of Microstructures with Toughness in HP 9-4-45 Lower Bainite and Tempered Martensite 55-63

Morphology of Martensite Formation in a 300-Grade Maraging Steel 219-229

Capacitor-Discharge Pulse Heating... 288-291

Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379

Effect of Carbides on Fracture Path in Lower Bainite and Tempered Martensite . 544-547

Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676

On an Unusual Type of Substructure in High-Carbon Ferrous Martensites 820-827

On the Nature of Microcracks in High-Carbon Martensite 1024-1027

MARTENSITIC STAINLESS STEELS

The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

MARTENSITIC TRANSFORMATIONS

The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369

Martensite-Start Temperatures Versus Pressure for 43XX Steels 768-775

The Formation of Low-Carbon Martensite in Fe-C Alloys 957-964

Structural Observations in a Metastable Austenitic Steel 965-976

MATERIALS SELECTION

Alternative Steels for Precision Gyro Ball Bearing 18-23

MERCURY

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

METAL COATINGS

Growth of the Inhibiting Aluminum-Rich Alloy Layer on Mild Steel During Galvanizing in Zinc That Contains Aluminum .. 729-739

METAL FOILS

Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections 285-288

METALLOGRAPHY

Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544

A Metallographic Method for Studying Reaction Kinetics in Spheres 547-548

METALLURGICAL CLASSICS

Metallurgical Classics 1039-1076

MICROHARDNESS

Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154

MICROSTRUCTURE

Nonuniform Size Changes of High-Speed Steels During Heat Treatment 130-139

Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352

The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369

Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379

Recrystallization in Thoria-Dispersed Nickel Sheet 390-397

Relationship Between Composition, Microstructure, and Stress Corrosion Cracking — in Salt Solution — in Titanium Alloys 457-469

Investigation of the Influence of Tungsten on the Morphology of the Gamma Prime Precipitation in Nickel-Base Superalloys 477-480

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation 949-956

MOLYBDENUM-BASE ALLOYS

Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323

Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851

NICKEL

Recrystallization in Thoria-Dispersed Nickel Sheet 390-397

Fracture Modes in Laminated Steel-Nickel Composites 812-815

NICKEL-BASE ALLOYS

Alternative Steels for Precision Gyro Ball Bearing 18-23

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44

Relative Long-Time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys 82-104
Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116
Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154
The Chemical Partitioning of Elements in Gamma Prime Separated from Precipitation-Hardened, High-Temperature Nickel-Base Alloys 195-200
Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237
Investigation of the Influence of Tungsten on the Morphology of the Gamma Prime Precipitation in Nickel-Base Superalloys 477-480
Coherency Strains in Gamma Prime Hardened Nickel Alloys 481-489
Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551
Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589
Hot Corrosion Reactions in Nickel, Cobalt, and Nickel-Aluminide-Base Alloys . 590-606
Precipitation in Nickel-Base Alloy 718 611-622
An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650
The Strength Differential in Two-Phase Alloys 711-720
Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

NICKEL PLATING

Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections 285-288

NICKEL STEELS

The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277
The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369
Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676
Fracture Modes in Laminated Steel-Nickel Composites 812-815

NIOBIUM-BASE ALLOYS

A Generalized Model for Hydrogen Embrittlement 1000-1006

NITROGEN

Effect of Nitrogen on the Fine Structure of High-Speed Steels 180-194

NONMETALLIC INCLUSIONS

Role of Specific Impurities on the Magnetic Properties of Low-Carbon Steels .. 257-262

NOTCH SENSITIVITY

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317
A Generalized Model for Hydrogen Embrittlement 1000-1006

NUCLEAR POWER REACTORS

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals.. 902-914

NUCLEATION

Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy 879-885
Precipitation of Hydrides in Titanium Alloys 977-988

ORDER DISORDER

The Recovery of the Cold Worked Compound AGMG 784-793

OVERAGING

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54

OXIDATION

Mechanisms of Formation of Ductile Fatigue Striations 281-285

OXIDE COATINGS

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

OXIDES

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129

OXYGEN

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456
Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551

OXYGEN, TERNARY SYSTEMS

The System Zirconium-Hafnium-Oxygen 915-925

PAIR PRODUCTION

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy..... 639-650

PARTICLE SIZE DISTRIBUTION

Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237

PEARLITE

The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446

PERTURBATION THEORY

A Perturbation Analysis of Phase Interface Stability in Ternary Systems 426-436

PHASE BOUNDARY

Liquidus of the Na-Ag System — 0 to 6 at Per Cent Ag 304-0

PHASE DIAGRAMS

A Perturbation Analysis of Phase Interface Stability in Ternary Systems 426-436
The System Zirconium-Hafnium-Oxygen 915-925

PHASE STABILITY

Relative Long-Time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys 82-104
A Perturbation Analysis of Phase Interface Stability in Ternary Systems 426-436
Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589

PHASE TRANSFORMATIONS

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel — A Mathematical Analysis ... 11-17
The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37
Morphology of Martensite Formation in a 300-Grade Maraging Steel 219-229
Capacitor-Discharge Pulse Heating .. 288-291
Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V . 324-332
The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

PHOSPHORUS

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation —— 1016-1018

PLASMA SPRAYING

Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys . 201-205

PLASTIC DEFORMATION

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44
Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116
X-Ray Technique for Examination of Single Crystals 293-297
Deformation of Artificial Inclusions in Compressive Plane Strain 297-300
Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352
Strength, Deformation Modes and Fracture in Titanium-Aiuminum Alloys 398-409
The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446
The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540
Strain Hardening of Iron by Severe Plastic Deformation 623-638
Influence of Deformation on the Tempering of 1045 Martensite 891-901

PLASTIC FLOW

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81
Work Hardening and Creep of Aluminum and Copper During Alternate Stressing 521-536
Plastic Flow in Binary Substitutional Alloys of BCC Iron — Effects of Strain Rate, Temperature and Alloy Content 690-710
The Effect of Temperature on the Early Stages of Plastic Flow in Titanium-Scavenged Iron 886-890

PLATE

The Effects of Geometry on the Cooling of Plates and Bars 333-344

PLUTONIUM-BASE ALLOYS

Chemical Diffusivities of Delta Stabilized Pu-Zr Alloys 1014-1015

POLISHING/METALLOGRAPHY

Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections 285-288
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

POWDER COMPACTS

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129
Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys .. 201-205

POWDER TECHNOLOGY

Fiber Breakage During Powder Metallurgy

Fabrication of Aluminum-Boron Composites 804-805

PRECIPITATES

Mechanism of Formation of Precipitate-Free Zones in an Al-4.7 Per Cent Zn-3.9 Per Cent Mg Alloy 724-728

PRECIPITATION

Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243

Precipitation in Fe-Ni-Co Alloys 852-857

Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy 879-885

Influence of Deformation on the Tempering of 1045 Martensite 891-901

Precipitation of Hydrides in Titanium Alloys 977-988

PRECIPITATION HARDENING

The Chemical Partitioning of Elements in Gamma Prime Separated from Precipitation-Hardened, High-Temperature Nickel-Base Alloys 195-200

Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V . 324-332

Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409

Investigation of the Influence of Tungsten on the Morphology of the Gamma Prime Precipitation in Nickel-Base Superalloys 477-480

Coherency Strains in Gamma Prime Hardened Nickel Alloys 481-489

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589

Precipitation in Nickel-Base Alloy 718 611-622

Mechanism of Formation of Precipitate-Free Zones in an Al-4.7 Per Cent Zn-3.9 Per Cent Mg Alloy 724-728

A Differential Thermal Analysis Study of the Age-Hardening of Brass Containing Nickel and Silicon or Nickel and Aluminum 805-809

Deformation Within Precipitate-Free Zones in an Aged Al-Zn-Mg Alloy 815-818

Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851

Strengthening of MP Alloys During Aging at Elevated Temperatures 930-935

Normalized Hardness Test Data for Aged Al-Cu Alloys 1020-1023

PRECIPITATION HARDENING ALLOYS

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650

PRESSURE VESSELS

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

PRESTRESSING

Effect of Prestrain Temperature and Rate on the Retardation of Strain Aging in Rimmed Steel 554-557

Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

PROTECTIVE COATINGS

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

PULSE HEATING

Capacitor-Discharge Pulse Heating .. 288-291

QUANTITATIVE METALLOGRAPHY

Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237

QUENCHING

The Effects of Geometry on the Cooling of Plates and Bars 333-344

The Effect of Quench Rate on the MS Temperature and the Structure of an Fe-C and an Fe-C-Ni Steel 362-369

RADIATION EFFECTS

New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

RATE OF CREEP

Experimental Correlations for High-Temperature Creep 155-179

Effect of Cracks on Creep Rate 502-511

Effect of Cracks on Creep Rate — Part 2 — Experimental 512-520

Mechanical Behavior of Tantalum-Base T-111 Alloy at Elevated Temperature 749-758

Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851

REACTION KINETICS

A Metallographic Method for Studying Reaction Kinetics in Spheres 547-548

RECOVERY

The Recovery of the Cold Worked Compound AGMG 784-793

RECRYSTALLIZATION

Recrystallization in Thoria-Dispersed Nickel Sheet 390-397

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456

RESIDUAL STRESS

Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

RETAINED AUSTENITE

The Influence of Case Properties and Retained Austenite on the Behavior of Carburized Components 829-838

RIMMING STEELS

Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steel 490-501

Effect of Prestrain Temperature and Rate on the Retardation of Strain Aging in Rimmed Steel 554-557

ROLLING

Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580

RUSTING

Structure of the Protective and Decorative Rust Formed on Low-Alloy Steels in the Atmosphere 278-281

SATURATION/MAGNETIC

The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

SCANNING ELECTRON MICROSCOPY

Electron Probe Determination of Phase Volume Fractions 818-819

SEGREGATIONS

Morphology of Martensite Formation in a 300-Grade Maraging Steel 219-229

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

SHEAR STRESS

The Strength Differential in Two-Phase Alloys 711-720

SHEET METAL

A Method for Determining Fracture Planes in Beryllium Sheet by the Use of Etch Pits 629-929

SIGMA PHASE

Precipitation of Sigma Phase in a Duplex Fe-Cr-Ni-Ti Alloy 879-885

SILVER

Temperature-Sensitive Embrittlement of FCC Metals by Liquid Metal Solutions . 418-425

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

Interdiffusion in Silver Versus Silver-Manganese — 8 At. Per Cent — Diffusion Couples 721-723

SILVER, BINARY SYSTEMS

Liquidus of the Na-Ag System — 0 to 6 at Per Cent Ag 304-0

SILVER BASE ALLOYS

Interdiffusion in Silver Versus Silver-Manganese — 8 At. Per Cent — Diffusion Couples 721-723

The Recovery of the Cold Worked Compound AGMG 784-793

SINGLE CRYSTALS

X-Ray Technique for Examination of Single Crystals 293-297

SINTERED ALUMINUM POWDER

The Strength Differential in Two-Phase Alloys 711-720

SLIP

Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116

Character of Slip Bands in Iron and a Mild Steel with Manganese 206-218

Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352

Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409

Influence of an Oxygen Atmosphere on Surface Slip in Fatigue of Inconel X-750 at 500 C 549-551

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650

SODIUM, BINARY SYSTEMS

Liquidus of the Na-Ag System — 0 to 6 At Per Cent Ag..... 304-0

SODIUM CHLORIDE, ENVIRONMENT

Relationship Between Composition, Microstructure, and Stress Corrosion Cracking — in Salt Solution — in Titanium Alloys 457-469

Hot Corrosion Reactions in Nickel, Cobalt, and Nickel-Aluminide-Base Alloys . 590-606

The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

SOLID LUBRICANTS

Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

SOLIDIFICATION

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44

Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-Ni3Ti Eutectic Alloy 105-116

Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154
Some Solutions to the Ternary Diffusion Equations with Variable Off-Diagonal Diffusion Coefficients 794-803

SOLUTION STRENGTHENING

Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V 324-332
The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540
Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948

SPACECRAFT

Alternative Steels for Precision Gyro Ball Bearing 18-23

SPECIMEN PREPARATION

Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

SPECTROSCOPIC ANALYSIS

An Auger Spectroscopic Analysis of the Extent of Grain Boundary Segregation 1016-1018

SPECTROSCOPY

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

SPHEROIDAL STRUCTURE

The Austenitic Transformation of a Spheroidite Microstructure of Eutectoid Carbon Steel — A Mathematical Analysis.... 11-17

SPHEROIDIZING

Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580

SPRAY QUENCHING

Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys . 201-205

STACKING FAULTS

An Analysis of Creep-Induced Intrinsic/Extrinsic Fault Pairs in a Precipitation Hardened Nickel-Base Alloy 639-650

STAINLESS STEELS

The Effects of Geometry on the Cooling of Plates and Bars 333-344
Fractography and Fracture Mechanics 380-389
New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

STRAIN AGING

Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54
Factors Affecting the Strain Aging Susceptibility of Box-Annealed Low-Carbon Sheet Steel 490-501
Mechanical Behavior of Tantalum-Base T-111 Alloy at Elevated Temperature 749-758
Dynamic Strain Aging During the Creep of a Mo-Ti-C Alloy 846-851
Strengthening of MP Alloys During Aging at Elevated Temperatures 930-935

STRAIN ANNEALING

X-Ray Technique for Examination of Single Crystals 293-297

STRAIN HARDENING

Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317
Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361
Work Hardening and Creep of Aluminum and Copper During Alternate Stressing 521-536
Fractographic Observations of Stretched Regions in Front of Fatigue Cracks . 540-543
Effect of Prestrain Temperature and Rate on the Retardation of Strain Aging in Rimmed Steel 554-557
Strain Hardening of Iron by Severe Plastic Deformation 623-638
The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868
The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878
Structural Observations in a Metastable Austenitic Steel 965-976

STRAIN RATE

Strain-Rate Sensitivity as a Measure of Ductility 291-293
A Comparison of Creep and Hot Working Strain-Rate Relationships 300-303
The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868

STRAIN SOFTENING

Low-Cycle Fatigue Crack Initiation in Ti-6Al-4V 263-270
Plastic Flow in Binary Substitutional Alloys of BCC Iron — Effects of Strain Rate, Temperature and Alloy Content 690-710

STRESS CORROSION CRACKING

Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81
Precipitate-Free Zones and Stress-Corrosion Cracking in a Ternary Al-Zn-Mg Alloy 238-243
Relationship Between Composition, Microstructure, and Stress Corrosion Cracking — in Salt Solution — in Titanium Alloys 457-469
The Mechanism of Stress Corrosion Cracking in Cu-Al Alloys 677-689
Deformation Within Precipitate-Free Zones in an Aged Al-Zn-Mg Alloy 815-818
The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

STRESS RELAXATION

Work Hardening and Creep of Aluminum and Copper During Alternate Stressing 521-536

STRESS RELIEVING

Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

STRESS-STRAIN CURVES

Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129
A Comparison of Creep and Hot Working Strain-Rate Relationships 300-303
Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361
The Influence of Temperature, Transformation, and Strain Rate on the Ductility Properties of Austenitic Stainless Steels 858-868
Structural Observations in a Metastable Austenitic Steel 965-976
A Generalized Model for Hydrogen Embrittlement 1000-1006

STRIATIONS

Mechanisms of Formation of Ductile Fatigue Striations 281-285
Fatigue Fracture Appearance and the Kinetics of Striation Formation in Some High-Strength Steels 651-658

STRUCTURAL STEELS

Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574

SUBSTRUCTURES

Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379
On an Unusual Type of Substructure in High-Carbon Ferrous Martensites 820-827
Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948

SULFUR

Effect of Thermal History on the Recrystallization Behavior of Low-Carbon 0.30 Per Cent Mn Steels Containing Oxygen and Sulfur 447-456

SUPERALLOYS

Relative Long-Time Stability of Carbide and Intermetallic Phases in Nickel-Base Superalloys 82-104
Investigation of the Influence of Tungsten on the Morphology of the Gamma Prime Precipitation in Nickel-Base Superalloys 477-480
Influence of Tungsten on the Gamma Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589
Precipitation in Nickel-Base Alloy 718 611-622

SUPERPLASTICITY

Quantitative Metallography of Microduplex Structures After Superplastic Deformation 230-237
The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540

TANTALUM BASE ALLOYS

Mechanical Behavior of Tantalum-Base T-111 Alloy at Elevated Temperature 749-758

TEMPER BRITTLENESS

Studies Utilizing Auger Electron Emission Spectroscopy on Temper Embrittlement in Low Alloy Steels 776-783

TEMPERING

Influence of Deformation on the Tempering of 1045 Martensite 891-901

TENSILE PROPERTIES

Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44
Elevated-Temperature Mechanical Properties and Fracture Behavior of a Ni-N13Ti Eutectic Alloy 105-116
Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129
Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154
Mechanical Properties of Dispersion-Strengthened Spray-Quenched Al-V Alloys . 201-205
The Effects of Cold Reduction by Hydrostatic Fluid Extrusion on the Mechanical Properties of 18 Per Cent Nickel Maraging Steels 271-277
Influence of Alloying Elements on the Low-Temperature Toughness of Martensitic High-Strength Steels 305-317
Anisotropy of Properties in Martensite as Developed by Thermomechanical Treatments 353-361
Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

The Cold Rolling Characteristics of Aluminum-Boron Fiber Composites 869-878
New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

TENSILE STRENGTH
The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37
Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54
Ultra High-Strength Maraging Steel Wire 244-256
Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574
Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580
Precipitation in Nickel-Base Alloy 718 611-622
Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676
The Strength Differential in Two-Phase Alloys 711-720

TERNARY SYSTEMS
The System Zirconium-Hafnium-Oxygen 915-925

TERNARY SYSTEMS
A Perturbation Analysis of Phase Interface Stability in Ternary Systems 426-436

THERMAL ANALYSIS
A Differential Thermal Analysis Study of the Age-Hardening of Brass Containing Nickel and Silicon or Nickel and Aluminum 805-809

THERMAL CONDUCTIVITY
New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

THERMAL EXPANSION
New Alloy Steels for Nuclear Reactor Pressure Vessels and Vessel Internals . 902-914

THERMAL PROPERTIES
Structure and Properties of Ni3Al — Gamma Prime — Eutectic Alloys Produced by Unidirectional Solidification 140-154
The Current Status of Thermomechanical Treatment of Steel in the Soviet Union 24-37
Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54
Anomalous Ductility of Trip — Transformation Induced Plasticity — Steel .. 607-610
Strengthening Mechanisms in Dispersion Hardened Nichrome 936-948
Structural Observations in a Metastable Austenitic Steel 965-976

THORIUM COMPOUNDS, ALLOYING ADDITIVE
Recrystallization in Thoria-Dispersed Nickel Sheet 390-397

TIN
Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

TITANIUM, ALLOYING ADDITIVE
The Effect of Temperature on the Early Stages of Plastic Flow in Titanium-Scavenged Iron 886-890

TITANIUM-BASE ALLOYS
Tensile-Ligament Instability and the Growth of Stress-Corrosion Cracks in High-Strength Alloys 64-81
Low-Cycle Fatigue Crack Iniation in Ti-6Al-4V 263-270
Mechanisms of Formation of Ductile Fatigue Striations 281-285
Phase Transformations and Strengthening Mechanisms in the Alloy Ti-6Al-4V . 324-332
Influence of Processing Variables on the Microstructure of Extruded Titanium 5Al-2.5Sn Alloy 345-352
Fractography and Fracture Mechanics 380-389
Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409
The Reactivity of Hydrogen with Ti-6Al-4V Under Fatigue Cycling at Ambient and Cryogenic Temperatures 410-417
Precipitation of Hydrides in Titanium Alloys 977-988

TITANIUM-BASE ALLOYS, CORROSION
Relationship Between Composition, Microstructure, and Stress Corrosion Cracking — in Salt Solution — in Titanium Alloys 457-469

TOOL STEELS
Frictional Studies of Tool Steel Against Ag, In, Pb, Sn and Cd Under High Pressure 552-554

TOUGHNESS
Controlled-Cooled Structural Steels Modified with Columbium, Molybdenum, and Boron 561-574
Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676
Plastic Flow in Binary Substitutional Alloys of BCC Iron — Effects of Strain Rate, Temperature and Alloy Content 690-710
The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767

TRANSMISSION ELECTRON MICROSCOPY
Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379
Preparation of Samples for Transmission Electron Microscopy by Illuminated Jet Polishing 1019-1020

TUNGSTEN
Microstructure of Arc-Cast Tungsten After High-Temperature Creep Deformation 949-956

TUNGSTEN, ALLOYING ADDITIVE
Investigation of the Influence of Tungsten on the Morphology of the Gamma-Prime Precipitation in Nickel-Base Superalloys 477-480
Influence of Tungsten on the Gamma-Prime to Eta Transformation and Carbide Reactions in Nickel-Base Superalloys .. 581-589

TUNGSTEN, FIBER METALLURGY
Improved Fiber Composite Tensile Performance by Mechanical Residual Stress Relief 740-748

TWINNING
Structure and Elevated-Temperature Mechanical Behavior of Unidirectionally Solidified Ni-Ni3Nb Eutectic Alloy 38-44
Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379
Structure and Mechanical Properties of Fe-Ni-Co-C Steels 659-676

URANIUM, REACTIONS/CHEMICAL
A Metallographic Method for Studying Reaction Kinetics in Spheres 547-548

VANADIUM, ALLOYING ELEMENTS
Mechanical Properties of Dispersion-Strengthened Spray-Quenched A1-V Alloys..201-205

VANADIUM-BASE ALLOYS
A Generalized Model for Hydrogen Embrittlement 1000-1006

VOIDS
The Effect of Deformation Voids on Austenite Grain Growth in Steels 470-476

WARM WORKING
Development of Fine Spheroidized Structures by Warm Rolling of High Carbon Steels 575-580

WEAR
Wear and Friction of Fiber-Metal Molybdenum Bodies Impregnated with Molybdenum Disulfide 318-323

WIDMANSTATTEN STRUCTURE
Structure and Properties of Dynamically Strain Aged Fe-Cr-C and Fe-Mo-C Alloys 45-54

WIRE
Ultra High-Strength Maraging Steel Wire 244-256
Electron Microscope Observations of Wire-Drawn and Rolled Steel in Two and Three Orthogonal Sections 285-288

WIRE DRAWING
Ultra High-Strength Maraging Steel Wire 244-256
Strain Hardening of Iron by Severe Plastic Deformation 623-638

X-RAY DIFFRACTION
X-Ray Technique for Examination of Single Crystals 293-297
Electron Metallography of the Substructure of Martensite in High-Carbon Steels 370-379

YIELD POINT
Structural Observations in a Metastable Austenitic Steel 965-976

YIELD STRENGTH
Strength, Deformation Modes and Fracture in Titanium-Aluminum Alloys 398-409
The Influence of Ferrite Grain Size and Volume Fraction of Pearlite on the Lower Yield Stress and Luders Strain of Carbon Steel 437-446
Effect of Prestrain Temperature and Rate on the Retardation of Strain Aging in Rimmed Steel 554-557
The Strength Differential in Two-Phase Alloys 711-720
The Improvement of Mechanical Properties of AFC 77 by Austenite Grain Refinement 759-767
Strengthening of MP Alloys During Aging at Elevated Temperatures 930-935
The Effect of Prior-Austenite Grain-Size on the Stress-Corrosion Cracking Susceptibility of AISI 4340 Steel 989-999

ZINC-BASE ALLOYS
Some Novel Consolidation Techniques for Dispersing Hard Second Phases in Metals and the Effects of Dispersoid Morphology Upon Mechanical Properties of Zinc 117-129
The Direct Observation of Superplasticity in Al-78 Per Cent Zn 537-540

ZIRCONIUM
Chemical Diffusivities of Delta Stabilized Pu-Zr Alloys 1014-1015
The System Zirconium-Hafnium-Oxygen 915-825

ZIRCONIUM-BASE ALLOYS
Effect of Iron-Rich Inclusions on the Fracture Characteristics of Zircaloy — A Metallographic Observation 543-544
